

## WEBSITE ACCESSIBILITY

We believe everyone should have fair and equal access to information on our website concerning the content we publish and the services we provide as a business. In order to accomplish this, we are happy to provide helpful tools and tips to those with disabilities to optimize your experience with us.

For those who are visually or hearing impaired:

- Use your text-to-speech feature to have your computer read aloud.  
NOTE: Consider a text to speech extension for your browser. We recommend the [Google Chrome Web Page Reader](#)
- Adjust your background and text colors
- Adjust the size of your mouse/pointer
- Increase your text size
- Magnify your screen

If you're still having trouble reading or hearing content on our website, please don't hesitate to contact us.
